***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, drawn to a variable illumination angle inspection system comprises a light source, a scanner, and a deflection element, classified in class 356, subclass 237.4.
  - II. Claims 25-34, drawn to a deflection element comprises a first and second deflecting surfaces wherein the first and second surfaces include mirrored surface and first deflecting surface is disposed at an angle with respect to the second deflecting angle, and wherein an illumination beam enter the deflection element from a first direction is output from the deflection element in a second direction, classified in class 359, subclass 196.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combinations do not rely on the details of the subcombination. The subcombination has separate utility such as confocal scanning microscope, cameras, or surgical illuminators, etc....

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

**If Invention I (claims 1-24) is elected, following election of species is required:**

5. This application contains claims directed to the following patentably distinct species of the claimed invention: **a) claims 5, 6, 7, and 17; b) claims 8-11 and 19-22 (assumed claim 19 depends on claim 14 because claim 19 fail to further limitation of claim 17); c) claims 12, 13, 23 and 24.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 14 are generic. The elected species will be examined with claims 1-4, 14-16 and 18.

**If Invention II (claims 25-34) is elected, following election of species is required:**

6. This application contains claims directed to the following patentably distinct species of the claimed invention: **a) claims 26, 28, 29, 30, 31, 32, and 34; b) claim 27; c) claim 33.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 25 is generic. The elected species will be examined with claim 25.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. William D. Pegg on 9/7/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
